New! QUEST - online knowledge database

Digital Information Platform about Kverneland Group's Agricultural Implements and Electronic Solutions

Sharing knowledge is multiplying knowledge

QUEST is Kverneland Group's new online knowledge database that provides you real time accessible information, wherever you are.

QUEST helps to find, manage and share knowledge in an easy and user-friendly way. It also enables users to share information and experiences.

Kverneland Group is a leading international company developing, producing and distributing agricultural machinery and services. Strong focus on innovation allows us to provide a unique and broad product range with high quality.

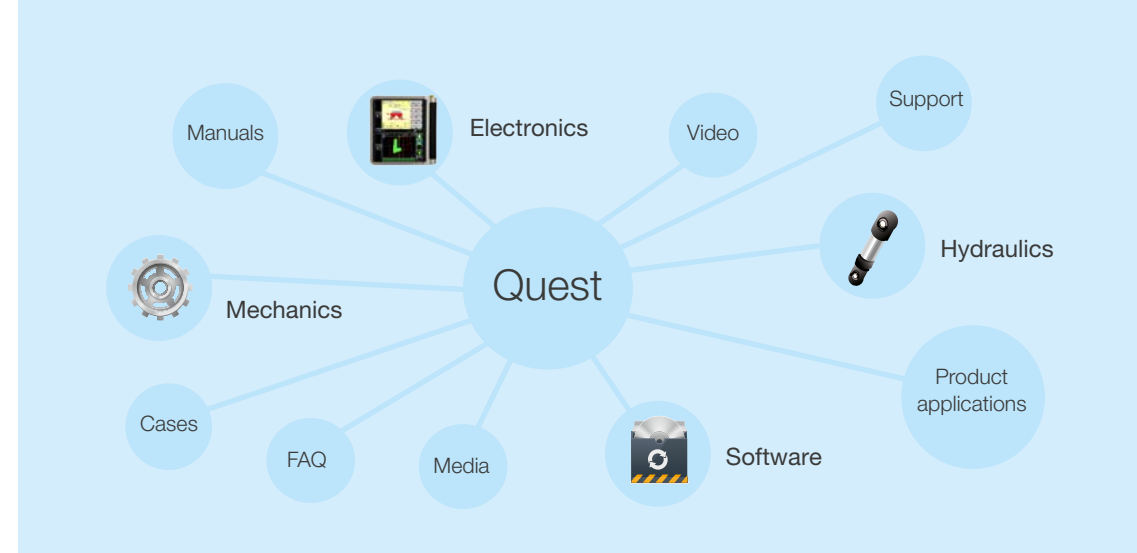

Three user levels guarantee that every user will find relevant information.

Together with dealer partners worldwide, we offer an extensive package aimed at the professional farming community, covering the areas of soil preparation, seeding, forage and bale equipment, spreading, spraying and electronic solutions for agricultural tractors and machinery.

QUEST is developed for all Kverneland Group organisations, dealer partners and importers worldwide to provide a professional tool to serve the customer in the most optimal way.

To ensure optimal functioning of our products in the field, fast and easy accessible product and service information is a necessity.

From the first quarter 2014, QUEST will also become accessible on a user-level so that customers can directly benefit from the knowledge as well. This will not only make the use and maintenance of the machine much easier, it will also increase the total share of experiences and recommendations.

SEARCH and FAVORITE

On QUEST you can find all about Kverneland Group's products, services and developments. Find the latest information of e.g. a seed drill, a weigh spreader or about the IsoMatch applications. QUEST provides access to instruction manuals, video material and other media. It also offers tips & tricks for usage of your machine in the field. You can set up the system to your own priorities.

OPTIMISE and SHARE

Share the information that you consider important for your colleagues: Your dedicated QUEST administrator gives you the possibility to add information. Your shared information can be posted for different target groups, in various technical sections and marked with the appropriate priority. And if you think any information is missing on QUEST? Simply add it or update what is already there.

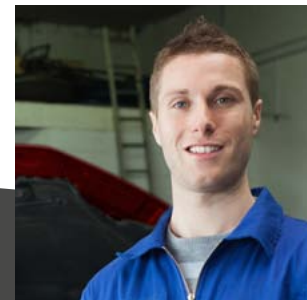

EASY and USER-FRIENDLY

Searching and posting information is easy with QUEST. An advanced search engine enables you to quickly navigate to your search on e.g. a product group, category, specific model or text. It only takes a few clicks to find what you are looking for or to share your message.

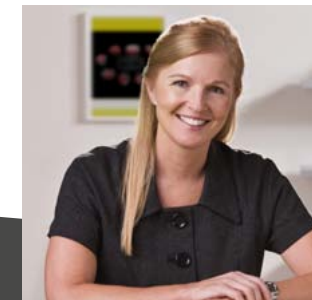

It's all about Convenience:

- User-friendly platform
- Easy model search functionality
- Quick and complete
- Multi-language support

"QUEST provides all the information in one place, very easy!"

"QUEST allows me to share my information with others"

"With QUEST I have the latest data available, wherever I go"
