

PRESS RELEASE

New Kverneland Spreading Charts Website and App's

Easy to Set Your Kverneland Spreader

01.12.2018, Nieuw-Venep, The Netherlands

Kverneland spreading charts – quick access to the correct settings

Kverneland introduces a new design for its spreading charts website and App for smartphones and tablets. A new and modern design is implemented in combination with an easy to navigate menu structure and quick access to the advice to set your fertiliser spreader correctly.

“The new design and navigation structure of the spreading charts website and the App for smartphones and tablets show how easy and quick you can get an advice for your fertiliser”, says Jeroen van Turenhout, Senior Product Manager. Based on the settings you have entered, you get an advice to set up your fertiliser spreader correctly in four steps.

The Kverneland Spreader Competence Centre in Nieuw-Venep (NL) is constantly testing new fertilisers which are published on the four different platforms which Kverneland has available to distribute the spreading charts. These are the website, the App for smartphone and tablets, the manual (which is standard delivered with a machine) and the AutoSetApp. The AutoSetApp gives you the opportunity to stay in the tractor cab and always spread with the correct settings!

The Kverneland spreader range is providing value out of every fertiliser granule, because every crop deserves the best care.
